Meccanismi auto-pesanti sincronizzati
Synchronized self-weighting mechanisms

M700

I meccanismi auto-pesanti si adattano al peso dell'utilizzatore della sedia. Abbinano ergonomia e comodità di un meccanismo con movimento sincronizzato del sedile e dello schienale alla praticità di non dover regolare manualmente la molla di oscillazione.

The self-weighting mechanisms adapt to the weight of the user of the chair. They combine the ergonomics and comfort of a mechanism with the synchronized movement of the seat and backrest.

M700 - Meccanismo autopesante con 4 posizioni di bloccaggio, assemblaggio della spatola senza ausilio di attrezzature.

Self-weighting mechanism with 4 locking positions. The plastic paddle can be assembled without using any tools.
